Flotilla - Touch

PIM028

The Touch module has four capacitive touch buttons and four bright white LEDs. It's ideal for reaction time games, a tiny piano, or a code entry keypad.

Features:

- CAP1166 driver chip
- Four capacitive touch buttons
- Four bright white LEDs
- Micro USB connector

Find Flotilla Cookbook recipes that use the Touch module at http://learn.flotil.la/cookbook/ or use Touch with Rockpool at http://flotil.la/rockpool/

Or use our Python Flotilla API to control the Touch module.

Note: Flotilla modules require a Dock and Flotilla ropes (USB micro B to micro B cables)
