

# “COMBO” CROSSOVER KIT

## MASTER REFERENCE OF ALL “PULSAR” PRODUCTS:

<b>PCB “Fab-In-A-Box”</b>	<a href="#">182-1027-ND</a>
- TTS Transfer Paper	<a href="#">182-1003-ND</a>
- GreenTRF film	<a href="#">182-1021-ND</a>
- WhiteTRF film	<a href="#">182-1022-ND</a>
- PCB (Single Sided)	<a href="#">182-1017-ND</a>
- PCB (Double Sided)	<a href="#">182-1018-ND</a>
<b>DecalPRO®</b>	<a href="#">182-1026-ND</a>
<b>“Combo” (both kits)</b>	<a href="#">182-1028-ND</a> (Shown Here)
<b>GBC® Laminator</b>	<a href="#">182-1029-ND</a>

Have the best of both worlds! Fabricate single & double-sided PCB's and your create your own custom enclosure **GRAPHICS**. This “Combo” kit gives you total flexibility for your projects.

Make single and double-sided PCB's with traces as narrow as .006" (due to very low undercutting with very fast etching times under 1 min) using our 1/2oz copper laminate. After the board has been populated and soldered, move on to creating your own commercial quality, professional looking “rub-down” dry-transfer text and graphics in WHITE, METALLIC or even FULL COLOR. Ideal for your “1-up”, prototype projects and limited mass-production! Both kits share the same transfer paper, WhiteTRF foil and laminator.

### KIT CONTENTS:

- TTS Transfer Paper 8-1/2" x 11" sheets (20)
- TRF Foil Sampler Foils, 8" wide x 36" (19)
- Carrier Boards Fiberglass, 8"x10" (2)
- CarrierTRF 1/2mil Mylar®, 8"x15'
- 3M Low-Tack Tape Special #2080 roll of tape
- Alignment Carriers Acetate Sheets (2)
- KK-2000 Alcohol-based adhesive spray
- Alcohol Swabs Cleaning pads
- PCB: Single-sided 8"x10", .032", 1/2oz (2)
- PCB: Double-sided 8"x10", .032", 1/2oz (2)
- GreenTRF (trace protect) 8" x 15' Flat Pack
- WhiteTRF (silk-screen) 8" x 15' Flat Pack
- Practice Images Color and B&W pre-prints
- Instructions Both for PCB & Decals

## PCB “FAB-IN-A-BOX”

and

## DECALPRO®*fx*

### ABOUT THIS KIT:

The “Combo” kit contains everything you need to make dry-transfer graphics except for two hardware items that you might already have or may need to purchase separately. They are a GBC® brand laminator and a hot air gun.

The GBC® Laminator required for this kit is stocked by DigiKey. This particular laminator is also used with the PCB (Printed Circuit Board) “Fab-In-A-Box” kit. (See Hyperlinks above to order this laminator).

We do not include a heat gun in the kit because many customers already have one (and who needs two!) If however, you don't have one, look for the least expensive one at your local Home Depot® or Lowe's® hardware store. An ordinary hair dryer won't work.

The only other “household” support items you will need are...

Paper Cutter

Paper Towel

Rubbing Alcohol

Bowl & Tray of Water

Can of Acetone

21 Carriage Drive • Crawfordville, FL 32327-2496
